

# Carlisle Events Services

Since 1987, Carlisle Events Services (CES) has become one of the leading suppliers of staff, stewards and resilience teams to sporting and entertainment venues across the UK and Ireland. This Wembley based company has worked with Sixt to meet all their transport requirements for their fleet of 300 vehicles.

## How Sixt helps us

“One of the first things that attracted us to Sixt was the flexible nature of the vehicle hire options. Our fleet can vary in size depending on the demand placed upon us by upcoming events and so we really need a hire partner who can work around our needs to supply an efficient service.

“As soon as we met with our local branch manager, we were really impressed by the level of customer service and were made to feel that no request would be a problem. Since the start of our relationship, we have regularly been able to spot hire at very short notice and Sixt continues to work with us to very tight deadlines to deliver exactly what we need, even if it requires out of hours assistance. It also helps that Sixt has an extensive network of branches and sister locations across the country, meaning that we are always able to access new hire vehicles easily, from

Lutons to minibuses to economy cars, in whichever area we are working in.

“A huge part of ensuring that our business runs smoothly and efficiently is the safe transportation of our staff and, by utilising a fleet hire solution from Sixt, we have the peace of mind that all vehicles have been safety checked to the highest standard before being placed on the road. This duty of care issue can be a huge undertaking for a company like ours, so working with Sixt removes any potential fleet management headaches for us.

“Another challenge facing us in the current climate is improving our carbon footprint. As a business, we undertake initiatives to promote greater environmental responsibility and encourage the development and diffusion of environmentally friendly technologies. However, we are simply

unable to cut our fleet down to assist in achieving these aims. By working with Sixt, we can meet this challenge as we are safe in the knowledge that the majority of the vehicles we hire are below 120g Co2/km and have a fuel consumption of 30 mpg or better. In addition, these vehicles are compliant with the new London Low Emissions guidelines which prevents any further spend on additional vehicle entry fees to central London.

“By partnering with Sixt, we can continue to provide an unparalleled service to our clients and work with a like-minded company that also prides itself on helpful, friendly and consumer focused service.”
